HISTORY

Read 'Why History' and learn difficult words

What is history?

History tells us about what happened in the past. It reveals how people lived, what they ate, where they lived.

What is ancient?

Ancient means very distant past.

Why do we study history?

We study history

- to know about our past; our ancestors...
- the kings and different dynasties that ruled us
- because it is exciting and interesting to know about our past
- as it tells us about our past, we can analyse our past and move toward a better future

History is the story of Man—the Early Man and about the present Man, as he is today.

History is divided into two parts—Prehistory and History.

Information inscribed on rocks

Scanned with CamScanner

'Pre' means before, therefore, prehistory means before recorded history. So, Prehistory is the period when there are no written records.

History is the period for which written records are available.

Drawing on cave walls

During the prehistoric period, people did not know how to read and write. They mainly used stone tools to draw images on cave walls and on stones.

Written records or manuscripts

What else did they do with stone tools?

- dug out roots
- cut leaves of plants for shelter, clothing
- used them for hunting
- protected themselves from wild animals

Different kinds of stone tools

Painting showing hunting activity of Early Man

Early Man could not read or write. But they knew how to *draw* and *paint*. They drew on the walls of caves and on rocks. With time they learnt how to sharpen their tools. This made their life easier. Now they could cut, dig and hunt easily.

But how do we know about people who cannot write?

We learn about them from the pictures they drew on the caves walls and things they used in their daily life.

Scanned with CamScanner

Who tells us about these paintings and dug out materials?

People who undertake the study of history by 'digging up of the past' are called **Archaeologists** and the study is known as **Archaeology**. It is with the help of archaeologists that we get knowledge of the prehistoric times, for which there are no written records. They carry out **excavations**, dig out old tools, pottery, jewellery and bones. These findings are called **artefacts**. Archaeologists study these articles and arrive at their conclusions.

Things used in daily life of Early Man

History is written records

Thousands of years ago, when there was no paper, Early Man wrote on stones, walls of caves and even bark of trees. People also wrote on **papyrus**, which was made from the thick grass-like plant growing near some rivers and lakes. Papyrus was mainly found along the river Nile in Egypt. From papyrus, the Chinese invented paper. With the discovery of paper, different forms of writing developed. **Language** and forms of writing—script developed. When historians carried out their excavations, thousands of **manuscripts** and **inscriptions** were discovered.

Mohenjodaro—an important city of the Indus Valley Civilisation was 'dug' out

Know This

Archaeologists have even dug out cities and buildings that have been under the ground for thousands of years. One such example is our own Indus Valley Civilisation, along river Indus and its tributaries. The cities of Harappa and Mohenjo-daro were discovered by Indian archaeologists in the 1920s.

A manuscript is a document or a book written by hand.

Inscriptions are words written on stones, coins or monuments.

Historians base their study on these written records and other dug out materials.

Inscriptions on stone tablets

Inscriptions, coins, metal tablets—all sources of History

As history tells us the story of the past, dates and events are of great importance because they give us an idea of when an event took place. When you read history books, you will come across dates before the events.

The letters BC and AD are written *before* or *after* the dates. BC stands for Before Christ and AD means *Anno Domini*, a Latin word meaning 'in the year of the Lord'. All these dates, BC or AD, are counted *before* or *after* the birth of Christ. Years with AD written *before* means years after the birth of Christ and it begins from 1. The years before the birth of Christ are counted *backward* with BC written *after* them.

What are the 'sources' of history?

- inscriptions
- coins
- archaeological findings
- literature
- foreign travellers' accounts

What is a timeline? How does it help us?

A *timeline* is a series of events in chronological order. A timeline helps us to understand different historical events that took place arranged in the right order. For example, a timeline of your life would be:

Similarly, a timeline in history can be arranged according to the events of a particular time.

Stone Age

The Stone Age belongs to the prehistoric period when we had no written records as the people did not know the art of writing. In the stone age, people used stones to *dig*, *cut*, *draw* and *paint*. With time they improved their tools of stone. Slowly they started making new stone tools.

For us to learn and understand easily, we divide the periods into the Old Stone Age and the New Stone Age. *Difference* of the two periods is based on the *tools* they made and their uses.

Old Stone Age

Tools were:

- ~ crude
- ~ large
- ~ blunt
- ~ rough

Crude stones used in the Old Stone Age

New Stone Age

Tools were:

- ~ polished
- ~ chipped
- ~ smooth
- ~ sharp, small

Polished stones of New Stone Age

Features of the Early or Old Stone Age Man

- Early Man was a nomad. He did not settle down in one place. He wandered from place to place, mainly forests, in search of food.
- Old Stone Age man ate roots, fruits, berries. Sometimes fish and meat of wild animals that he hunted.
- Lived in caves and in forests.
- Hunted wild animals for food and used their skin as clothing.
- An important event was the discovery of fire.

Painting of Early Man leading a nomadic life

How was fire useful to Early Man?

- gave light
- gave warmth from the cold
- frightened away wild animals
- roasted animal flesh and therefore made food tastier

A forest fire

Know This

Nobody really knows how Early Man discovered fire. Probably, when two stones were rubbed sparks flew out. Maybe, the sparks hit some dry leaves and grass nearby that led to a big fire.

4. Answer in one sentence.

(a) What is history?

(b) What is history divided into?

(c) Mention two things that the stone age man did with his tools.

(d) Give one difference between the Old Stone Age and New Stone Age tool.

(e) State two uses of fire.

Something interesting to do

➤ Make a timeline of important events of your elder brother/sister's life and draw it in your scrapbook.

➤ Make a scrapbook and paste pictures of tools of the Old Stone Age and New Stone Age.

➤ Divide the class into four groups—each group may make some model or representation of Old Stone Age or Prehistoric Man.

➤ A documentary on Early Man can be shown to the students in the AV room.
